

CORPORATE ITEMS / CUSTOM

ISO Corporate Quality Flags and Banners

Proudly display your certification and commitment to quality with an ISO/QS flag! Lettering is appliquéd (sewn) so that your flag reads correct on the front and reverse on the back. Flags are finished with canvas heading and brass grommets – and we only use 100% 200-denier nylon treated with SolarMax[®]. This makes the flags suitable for both indoor and outdoor use. All designs can be finished as a banner!

For color choices, choose from the colors on the chart on page 17.

TECHNIQUES FOR CUSTOM FLAGS & BANNERS

A custom made flag or banner exemplifies pride in your business or organization. Whether you need one flag or thousands of flags, we will work with you to produce a magnificent product! Custom made flags and banners are available in a variety of shapes, sizes and constructions. If you have questions in determining design or construction, contact us for expert assistance.

APPLIQUÉ — These beautiful flags and banners reflect the truly fine craftsmanship available from Flag-Works over America. Appliqué requires extensive seamstress work in producing each flag or banner. We use a 200-denier nylon to create your design. The results are both attractive and luxurious. Choose from a variety of elegant colors to make your flag or banner truly outstanding. This process has a minimum of one piece and is usually not recommended for large quantities. Appliqué is priced by the intricacy of the design. For an exact quotation please submit your artwork to our custom department for review.

PRINTING — When large quantities (12+) are required at a budget price, printing is the method of choice. Detail of lettering style and complexity of design do not affect the cost of this method of production. Quantity purchases result in low unit cost and high visibility for your investment. Price is based on the number of colors, size and quantity of your flags or banners. Computer disk files in vector format are required along with a color printout of the design. A variety of fabrics are available for your design depending on the intended use. Contact our custom department to discuss your needs and receive an exact quotation.

DYE PROCESS — When you need a large quantity of custom flags or banners and nothing but the best will do, our dye process is what you need. A dyed flag or banner will have complete penetration of dye to the fabric's core, producing a rich, radiant appearance and extremely durable colors and design. Price is based on the number of colors, size and quantity of flags or banners you need. Contact our customer service department for an exact quote and artwork requirements.

SUBLIMATION PROCESS — When your artwork has tonal gradations, or requires higher than normal resolutions our sublimation process will provide the quality you demand and the price you require.
